

Alicia Zhou, Ph.D.

**Chief Scientific Officer
Color Health
San Francisco, California**

Dr. Alicia Zhou is Color Health's chief science officer, leading the research, scientific and medical affairs teams. She is responsible for managing research collaborations with academic institutions, biopharmaceutical companies and large population initiatives as well as initiating, executing and publishing peer-reviewed manuscripts and research by Color's scientists and engineers. Dr. Zhou is also an active part of Color's market development team for population health initiatives and research. Dr. Zhou received her Ph.D. degree at Harvard with a specific focus on cancer genomics, where her research spanned work at both the Dana-Farber Cancer Institute and the Broad Institute of M.I.T. and Harvard. She subsequently performed her postdoctoral work at UCSF.
